INTRODUCTION

Strategic planning is a process for defining an organization’s strategy or direction. It guides the organization’s future decisions about how to allocate its resources and which of the possible avenues for future growth the organization will pursue.

Located in downtown Los Angeles, at 1st Street and Broadway, just steps away from both the Stanley Mosk Courthouse and Clara Shortridge Foltz Criminal Courthouse, the LA Law Library is a global leader in providing state-of-the-art legal research and services. With nearly one million volume equivalents of Federal and State materials, a comprehensive California collection and one of the nation’s largest foreign and international law collections, the LA Law Library is the second largest public law library in the United States.

LA Law Library is in the midst of significant change as a result of resource constraints, societal and technological changes and internal transitions. The way people access and use legal resources, the way they interact with each other, the way the courts operate and the tools and capabilities needed to access justice are all in flux. This Strategic Plan is intended to help guide the Library during this period of significant change.

COMPONENTS

The basic components of the Law Library’s Strategic Plan are: the vision statement; the mission statement; the goals and the objectives. The Vision Statement is a future oriented statement that clearly articulates what the Law Library wishes to become; it conveys the core values of the Library and identifies the community that the Library wishes to serve. The Mission Statement addresses what the Law Library does, for whom as well as how and why. It is a statement of what can be done today. In other words, the Mission Statement says who we are, while the Vision Statement expresses who we want to become. The Goals identify what needs to be accomplished to achieve the Vision and Mission. The Goals establish the direction and focus for the Law Library’s resources and efforts, ensuring a longer term focus. The Objectives frame how the goals will be accomplished; by whom; when; and what are the performance benchmarks/desired results.

Overall, the Strategic Plan is a tool designed to ensure that the Law Library accomplishes the Goals and achieves the Mission and Vision it has determined are important. Everything contained in the Strategic Plan is designed and oriented toward achieving the library’s Mission and Vision. The Plan ensures that everything the Law Library does contributes to the Mission and Vision and that all participants – from the Staff to the Board of Trustees – stay focused and move in the same direction.

PROCESS

The Law Library engaged in a comprehensive process to assess, analyze and document strategies for the future development of the Law Library.
Work Plan and Committee

The Board of Trustees approved a Timeline and Work Plan (Attached as Exhibit 1) for the strategic planning process that included steps for developing vision and mission statements, gathering data and input and establishing goals and objectives.

A team of staff members representing all departments within the Law Library was established to implement the work plan, develop recommendations and discuss policy considerations. In addition, the entire Library Staff participated in planning and concept development at interactive group workshops.

The President of the Board of Trustees appointed a committee composed of Board Members Juhas, Jones and Court to participate in the Strategic Planning process in detail at each stage. The committee provided comments and recommendations to the Board as a whole.

Vision & Mission Statements

Two of the basic components of a strategic plan consist of the Vision and Mission Statements. The LA Law Library has had a variety of vision and mission statements over the years.

For example, in October 2006, the Board adopted the following vision statement:

The LA Law Library is the leader in providing public access to legal information.

In 2011, the following vision statements were presented by the Executive Director and adopted by the executive team:
10 Year VISION: LA Law Library is the de facto State Law Library, providing excellent cutting edge 24x7 services to constituents and all other libraries.

3 Year VISION: LALL is the premier architect transforming experiences in the delivery of services and information.

Similarly, in January 2007, the Board approved the following mission statement:

The LA Law Library provides access to legal information through effective, efficient and collaborative services in order to support current and emerging user needs in a dynamic legal environment.

In 2011, the following mission statement was presented by the Executive Director and adopted by the executive team:

Our mission is to be the central source for legal information, research and continuous learning, providing services & relationships for success whenever and wherever needed.

The Strategic Planning Committee reviewed these as well as numerous other options and examples presented by Staff. The Strategic Planning Committee also reviewed vision and mission statements from 50+ other public law libraries nationwide (attached as Exhibit 2) and recommended Vision and Mission Statements to the Board. Some of the significant objectives and premises articulated by the Committee in drafting its recommended statements were:

1. The vision should inspire and motivate; it should reflect a goal of something more than what is already being accomplished at the Law Library.

2. The Law Library is not merely a building full of books; it should be busy, vibrant and active and serve as an educational center.

3. The Law Library does not serve only lawyers, citizens, customers or residents; it serves people, all those seeking legal knowledge or information.

4. The language of the statements should be inclusive, not exclusive; the collection is meant to be shared and used.

5. The role of the Library (and librarians) expands and changes as the needs of the community change; the reorganization of the courts will intensify the need for flexibility.

6. The Law Library should not expand beyond its area of expertise, but should recognize its position as an integral part of a larger system and network of justice and social services, partnering with other agencies and embracing a role as a facilitator and guide.

7. The statements should recognize the Law Library’s location in, and relationship to, the County of Los Angeles, but also the importance of operating within a global environment where geographic boundaries are becoming less and less significant.

8. The statements should recognize the importance of the LA Law collection as a unique and valuable resource.

9. The language of the statements should be plain English, without pretense or jargon.

Revised Vision and Mission Statements (included in the complete Plan below) were approved by the Board on March 21, 2013 and were then used to guide the Strategic Planning Process going forward.
**SWOT Analysis**

As a foundation, the strengths, weaknesses, opportunities and threats facing the Law Library were identified.

![SWOT Analysis Diagram](image)

**Outreach**

The plan for soliciting stakeholder input relied primarily on a survey posted on the website, used at meetings and mailed to key stakeholders, but also included collecting input at staff meetings, Board meetings, meetings of existing organizations, invitational group meetings, individual meetings, phone calls and outreach on existing list-serves. The important stakeholder groups along with the proposed outreach efforts for that group were identified by the Library staff in collaboration with the Strategic Planning Committee and presented to the Board for approval. The Board approved the plan (attached as Exhibit 3).

**Survey**

The survey questions were developed based upon research into critical issues facing libraries in general, surveys conducted by other libraries, input and suggestions received from patrons and extensive contributions by Library Staff members. The survey questions are attached (Exhibit 4). The survey was used to implement the outreach plan. Both the number of respondents and the diversity of user categories, geographic and demographic categories and areas of focus exceeded expectations. The information gathered was useful, informative and interesting; some results were expected and
unsurprising (e.g., the extent to which parking is an impediment to access), while others provided new insight (e.g., the number of people interested in volunteering in the Library). The numerical or multiple choice responses were compiled and the free-form (qualitative) responses were summarized in a summary report reviewed by the Board. (Attached as Exhibit 5 is the summary of the results, along with a map by zip code of the respondents.) These results guided and informed the development of the Goals and Objectives.

Goals and Objectives

The Goals and Objectives were developed based upon the online and in print survey, workshops with all of the Law Library staff, discussions with other stakeholder groups, input developed during the concurrent budget process and meetings of the Strategic Planning Committee. The Goals and Objectives incorporate suggestions and requests made by survey participants, Law Library employees, Law Library partners and other service agencies, as well as the Strategic Planning Committee. They were also reviewed by the Strategic Planning Committee and approved by the Board.

LOS ANGELES COUNTY LAW LIBRARY
STRATEGIC PLAN

The four components of the Strategic Plan – vision, mission, goals and objectives -- are set forth below. The goals are broken into six categories:

1. Collection (C1 through C3)
2. Community (Comm 1 through Comm 4)
3. Working Environment (W1 through W4)
4. Technology (T1 through T2)
5. Fiscal Goals (F1 through F3)
6. Service Goals (S1 through S4)

Under each goal, there is a list of objectives. These are the projects and programs that will implement that specific goal. Although some objectives implement more than one goal, to avoid redundancy and facilitate tracking of implementation efforts, each objective is listed under the primary goal it implements. Specific milestones, target dates and project descriptions are included for each Objective. Some objectives are expected to be completed within the current fiscal year, while others have timeframes of 3 to 5 years.
**VISION**

The LA Law Library is a vibrant community education center in Los Angeles County and a leader in providing public access to legal knowledge, putting national and international sources of law into the hands of those seeking legal information.

**MISSION**

The LA Law Library proactively supports people’s needs in a dynamic global environment, acting as the curator and cultivator of a superior collection of legal resources, a gateway to legal information and a navigator facilitating access to the legal system.

**Goals and Objectives**

**COLLECTION**

Collection Goal 1: Continue to build, disseminate, and make accessible a superior collection of local, California and American legal resources

*C1(A): Track usage, visitors and performance metrics*

Project Scope: Staff will research available technology for tracking circulation, in-house usage, document delivery, inter-library loan, and other numerical or statistical data related to collection performance. Staff will make recommendations for products and procedures and coordinate the implementation of new programs. Existing resources already in use at LALL will be integrated into new programs. To be coordinated with objective C1(C).

- Research methods available 10/31/13
- Formally implement programs 11/30/13
- Evaluate results 12/31/13
- Completion 1/31/14

*C1(B): Conduct patron surveys and focus groups regarding legal resource materials needs*

Project Scope: Staff will collect quantitative and qualitative data from library users to identify the subject areas, print materials, and electronic resources that are most in demand. This may include collection of samples from partner agencies, expansion of access to existing programs or development of new materials. This project will also explore opportunities and feasibility of expanding access to interactive court-based forms assembly software.

Contra Costa Law Library

Introduction
The Contra Costa County Public Law Library is governed by a seven-member board of trustees. At the present time, the library includes a main branch in the county seat of Martinez, in accordance with Section 6340 of the California Business and Professions Code, and a satellite branch in Richmond (B&P §6341). Both libraries are open Monday through Friday, except for holidays. The Martinez facility is open from 8:00 - 5:00, and Richmond is open from 8:00 - 4:30. Martinez remains open all day, while Richmond closes between 12:00 - 12:30. Plans are underway to add a new branch of the library within the new Pittsburg courthouse in 2010 (B&P §6341). This will extend service to the east county area.

The law library is very much a public library. There are several distinct user groups: the general public, many of whom are representing themselves in a legal action; the legal community including judges, commissioners and attorneys and their staffs; and students. Each group can be said to have unique legal information needs.

Executive Summary

The need for a new strategic plan grew out of the expiration of the previous strategic plan of the Contra Costa County Public Law Library (2005-2008). After hiring a library director in 2008, the Board of Trustees worked with staff to develop a strategic plan to be used as a framework for guiding the activities and decisions of the organization during the next three years.

The following statements of the library’s vision and mission, the goals of the plan, are summarized. After the summary, the goals are explained more in depth and the strategies needed to achieve these goals are defined. In some instances, the strategies overlap because they serve more than one goal.

Vision

The vision of the Contra Costa County Public Law Library, is to be a significant legal information resource center committed to excellent service. The Contra Costa County Public Law Library strives to provide an environment that is conducive to learning and research.

The strategic plan during the next three years, will be rooted in priorities which fall into the categories of access, service, collaboration and training.

Strategic Directions Through 2014
The Law Library’s five year strategic plan is aligned with the strategic goals of the School of Law and the University. It is also informed by noted weaknesses and threats. Five strategic areas of emphasis are identified: services, physical space, communication, technology and stewardship.

Goals by Strategic Area

Services
1. Establish a Library Fellow program to start with the 2010 fall semester.*
2. Develop methods of identifying and pushing content of interest to our students and faculty. – December 2010
3. Increase the library’s awareness of faculty needs through a series of meetings, surveys and other means designed to identify interest groups and needs specific to them. – June 2011
4. Identify a reference model suited to the needs of our faculty and students, resources, and culture. – December 2011
5. Determine vehicle(s) for discovery of information surrounding the discrete research needs of students. – June 2012
6. Increase content created by the Law Library for the benefit of faculty and students and evaluate new and developing technologies as a means of delivery. – 2010-2014
7. Develop the ability to promote faculty activity and scholarship through online social media networks. – 2010 – 2014
8. Enhance the Law Library’s print collection through culling and supplementation in consultation with our faculty and in a manner consistent with our Collection Development Policy. – 2010-2014

Physical Space
Enhancing physical space to provide a comfortable, inviting environment that promotes collaboration, research, and access to the collection and the library staff is a vital part of our plan. Actions toward these goals, however, depend on access to funds beyond our direct control. Furthermore, as much library space seamlessly flows into the space of students and other departments, our planning must be collaborative. With these caveats, and without the ability to state meaningful deadlines, we, nevertheless, recognize the following urgent needs:
1. Collaborative group study space.
2. Individual study space beyond the carrel.
3. Better access by students to public service librarians.
4. Work space for library staff that enhances workflow, collaboration, productivity, and is consistent with the evolution of the library to a service based institution.

We recognize that our current stacks space is limited. During the past two years the library has engaged in a massive weeding process intended to better utilize and manage our existing space. This process along with an increased digital preference for many materials provides much needed growth space within the stacks. Still, the existing space is finite and the library will encounter capacity issues within the coming decade. As contemplated within the Stewardship portion of this document, the library will continue to explore opportunities for collaboration on space matters with regional libraries and within the University.

Communication
Other Law Library Strategic Plans

1. Identify and implement ways to increase the effectiveness of library meetings and other forms of internal communication. – June 2010
2. Communicate and collaborate with law media and law tech to enhance the availability and utility of electronic resources. – June 2011
3. Promote library resources to members of the Law School Community -2011-2012

Technology
1. Examine new technologies as a means to promote effective communication with the students and faculty. – June 2011
2. Explore new software and license agreements to provide new resources to students and faculty. – June 2011
3. Create a position for an electronic services librarian as a JD/MLS position.* – June 2014

Stewardship*
1. Encourage professional development and participation in the library community. – June 2014
2. Investigate opportunities for collaborative agreements, creation of content and the creation or participation in institutional and regional repositories. – June 2012
3. Develop a succession plan in light of expected extraordinary turnover by retirement of staff in the coming decade. – June 2012
4. Identify preservation needs within the collection and create a comprehensive conservation strategy. – June 2011
5. Enhance the relationship between the University Library and the Law Library in areas of acquisition, space, and technology. – 2014
6. Identify and pursue funding opportunities to support the library’s activities in collaboration with the Law School. - 2014

The library supports the mission of the Law School by acquiring, providing access to, and guidance in the use of the best resources in support of the curriculum of the Law School and the scholarly interests of the faculty and students. Additionally, it supports the legal research requirements of the larger university community.

Survey Comment

“Legal assistance is for the very rich (and sometimes for the very poor—if they are lucky enough to get competent free legal assistance or representation provided by the government). But legal assistance for most of us in the middle of that gap is devastatingly expensive.

Prohibitive legal costs have forced people to give up their rights, and have caused others to empty retirement funds and other finances when the need was unavoidable to protect their rights. Providing resources that help a person to help him or herself can help that person to try to preserve some of her or his rights.”
